

# WASTE MANAGEMENT & DISPOSAL

OMI Environmental Solutions (OMIES) provides turnkey waste management services for managing and transporting all hazardous or non-hazardous waste streams from non-bulk to bulk packaging. We can collect representative samples of the waste streams for submittal to accredited environmental laboratories for proper analysis/ waste characterization. Once the waste stream is characterized, OMIES can ship waste to a permitted facility as designated by our customer, or if the customer does not have a facility preference, we will

suggest the facility which best suits the waste stream and the customer's best interest. OMIES also has N.O.R.M. licenses in Louisiana and Texas, along with 40 hour trained Radiation Safety Officers (RSO) on staff. Our waste management division can also perform background confirmation and analytical testing for site remediation through the same accredited laboratories utilized for waste characterization. OMIES is dedicated to offering the most cost effective, compliant and efficient methods of waste management.

## AREAS OF DISCIPLINE INCLUDE:

- Bio-Hazardous Waste Management
- Compressed Gas Cylinder Identification & Management
- Field Sampling Services
- Lab Pack Services
- Waste Characterization, Profiling, Disposal & Transportation
